

This product is produced by mixing peeled sweet almonds, peeled bitter almonds, sugar and water in varying proportions. This mixture is refined by passing through knives that will determine the structure of the product. The refined mixture is cooked for a specific time at 100 °C in order to stabilize the product. The marzipan is then cooled and formed into blocks that are packaged with a slight vacuum compensated with nitrogen (N2).

## MANUFACTURING COUNTRY

ITALY

## AVAILABILITY

Available in a wide range of types with customizable recipes according to the needs of our customers

## NUTRITIONAL VALUES

Calories	477 kcal
