

This product is produced by peeling Natural Sweet Almonds (*Prunus Dulcis*), through immersion in boiling water which causes the detachment of the integument, then removed by food grade rubber rollers. The almonds are finally dried and cooled before being checked by passing through various latest generation sorting machines and metal detectors in order to discard any non-conforming almonds or any foreign bodies of any kind.

Successively cut to the desired thickness through the passage in slicers and sieved to obtain the characteristics required by our customers.

### ORIGIN

USA: other sources are available upon customer's request

### MANUFACTURING COUNTRY

ITALY

### AVAILABLE SIZES

Extra Fine: 0,3/0,5 mm

Fine: 0,7/0,9 mm

Regular: 1,0/1,2 mm - 1,2/1,5 mm
